

K5

SOUND LIBRARY

SOUNDS FOR
KAWAI K5/K5m SYNTHESIZERS

Third Edition

January 1989

This guide is a listing of the patches currently available from Kawai. It is part of our programming effort to make a wide variety of sounds available. Patches are continually being added and improved.

The patches in the Kawai K5 Sound Library are available free of charge as a service to K5 and K5m owners. Kawai DC-32 RAM Cards programmed with one of these sound banks are available at the same price as blank cards. New sounds can easily be programmed into any RAM Card and the sounds can be rearranged by using the SAVE, LOAD and WRITE functions on the synthesizer.

The patches in the K5 Sound Library were created by the worldwide staff of Kawai EMI and many professional musicians around the globe. We thank them for their quality work.

Internal Patches, Version 3.1 (Programmed in the K5 Internal Memory)

ABOUT INTERNAL PATCHES, VERSION 3.1:

The patches programed into the K5's internal memory showcase its wide range of timbral possibilities. From the explosive "PRSHORNS" to the bright "FMRHODES" and lush "ROMANTIC," the musical results of the K5's Additive Dynamic Digital synthesis technique can be appreciated and enjoyed.

The Version 3.1 also incorporates five multi-channel Multis for use with multi-timbral demo sequences.

ABOUT SOUND CARD 1:

The Optional Sound Card 1 contains many new Bass sounds, an entire bank of Organ timbres, as well as sound effects. Other notable sounds are Flute and Vibraphone. A sampling of the Multi Patch possibilities are included, with ample room to create your own personalized versions. Incorporate these sounds with your other sounds to create your own personal sound banks.

ABOUT THE CARD PATCHES:

The Sound Card included with each K5 and K5m further extends the basic sound library of the internal sounds, with a wide variety of modern digital sounds. The Multi Patch programs showcase the unparalleled sophistication of the K5, with multiple split layers bounded by both key and velocity range.

ABOUT SOUND CARD 2:

The Optional Sound Card 2 contains a full bank each of String and Brass timbres, plus Winds, Voices and other orchestral tones. 24 Multi Patches are included, with room for more of your own.

ABOUT SOUND CARD 6:

These sounds were created using the Opcode's intelligent random patch generator, Patch Factory, found in their K5 Librarian program for the Apple Macintosh. We created a large set of patches, then selected the best for inclusion in this card. We think you'll find them very musical.

A sampling of the Multi Patch possibilities are also included.
